175 years of the publication of the Communist Party, 175 years since Marx and Engels, mainly Marx established it and was written from November 1847 to January 1848, when he was established, and published in February February

1848. This year 2023 we are Under that great omen, universal unhito illuminates this new period of revolutions in the era of world proletarian larevolution.

The International Communist Movement, has a starting point "El Manifesto", are 175 years since its appearance. Before there were attempts there are already a history, Silos there are; In Marx's own work and Engels we have his participation in LaLiga de los communist, but that League of Communists was a knead of Divive ideas, it was not a clear expression of the proletariat. It is only with the manifiest of the Communist Party, which is its full name, which at the same time first the communists propose their position and their program and is the departmental point, the corners the great Marxism-Leninism-Maoism; It is to appear from the manifesto that it is still a valid flag to communism, Jrushchov said: that he had finished his mission with the PCUS program of the 61 . Therefore, the manifiest is our starting point, the first miliar stone, a thousands of years will last and when there is communism, it will continue to be conside by that great beginning that led to the new humanity.The proletariat generates ideology: Marxism-Leninism-Maoism, mainly Maoism for the world revolution and Marxism-Leninism-Maoism, Gonzalo thought, mainly Gonzalo thought for Peruvian Larevolution. Marxism was the base by Marx. Marx and Engels take the best that produced humanity: the German classical philosophy, the English and social -social economy to base the ideology of the problem. Marxism has not taken a step in life without a fight against erroneous contributions, thus had to face Proudhon and anarchism, against right -wing deviations and alleged creative developments Dedühring, against opportunistic positions that arise in the German Social Democratic Party. Subsequently, the old revisionism is going to develop after the death of Engels with Bernstein and Kautsky and Lenin will adhere. In summary, Marxism in its first stage will establish Marxist or dialectical materialism, Marxist political economy and scientific socialism.

For a true political equality for women

!For a true political equality for women1](https://www.revolucionobrera.com/wp-content/uploads/2023/02/Mujer-y-politica-copia.jpg)The deep cause of the unequal and oppressive situation of the woman was and continues of an economic nature. With the emergence of private property, in Palabras de Engels, the man also wielded the reins in the house; Lamujer was degraded, turned into the servant, the slave of man's lalujuria, in a simple reproduction instrument. Since then, in all societies based on private property, Lamujer's situation has been oppression and inequality against man.

In the history of mankind, capitalism is the last society divided in classes and whose social relations of production and regime of ownership of the means of

production are based on the existence and protection of private property, that is the reason why it still persists and the situation of oppression and inequality of women is more brutal.

Oppression and inequality that is disguised by the hypocritical statements of bourgeois democracy, about the guarantee of equality for women in all spheres of society, hypocrisy that becomes “brilliant and enviable” if compared to the open oppression and inequality of the Woman, governed by Islamic laws in the states of theocratic dictatorship of the explolators.

One of those social spheres is politics, in front of which the bourgeoisie affirms that in capitalism women enjoys full equality because the constitutional laws of the bourgeois republics guarantee full political rights, including the right to vote and to be chosen as rulers.

The classic claim of the suffragists, ─ and in particular of the feminist of the early twentie real ”with the practice of parity in the electoral lists and in the designation of bureaucratic positions in the state; parity that the reformism monitors as the maximum conquest in the struggle for the political equality of Lamujer.Not even the bourgeoisie in its time of revolutionary splendor, considered the political equality of women; Jean Jacques Rousseau when the reason for political equality for all citizens said, expressly not including women. _ The logic of Rousseau was that women should be educated in a way to instill that obedience is the highest virtue, according to the Indian communist Anuradhaghandy.

Today some bourgeois and even small -speaking women exercise high political charges, by election or by designation as presidents, vice presidents, ministers, mayors, governors ..., but always subject to the demanding decision of the men's political chiefs, and always with lower salaries those received by men . Such participation does not resolve the political inequality of women, nor of those who govern or the governed, since every bourgeois state, whatever its form, is a class dictatorship, and the women who exercise ruling positions are instruments of that dictatorship to present inequality social that presupposes the inequality of women. Recent judge is that of Dina Boluarte, who in Peru elevated to the presidency on December 7, 2022 for a constitutional coup, at the end of January, he added under his political responsibility more demanding murders(58)What days in office(55), and continues to launch the staging state

repressive machine against the mobilized people, of which nomenos of half are women.

Diametrically different is the program of the revolutionary proletariat to make the emancipation of women reality and, as part of it, provide a true and real political equality.

To abolish private property and suppress forever the right that the man gives to the man to oppress the woman, the revolutionary proletariat first to assume the government of society, so that the task in a question of the socialist revolution in Colombia is to destroy the power of the power of the political power of The bourgeoisie, landowners and imperialists. But noble with the destruction of his state apparatus; This is hardly the condition for the true triumph: the creation of a new type of state, the stages of the dictatorship of the proletariat_.Thus, the new state of dictatorship of the proletariat, through the participation of women in equal foot with men, opens the way for its truth emancipation, and for the first time in the history of the societies different in classes, women conquer a real political equality Paraser part of the new “Government System, the Assemblies of Poor Workers and Campesinos, supported by the General Armament of the People”, organizations of the direct power of women and armed men linked to the management of all the affairs of the State, the body of power that “" It will expropriate and confiscate without compensation all the financial, industrial, agrarian, commercial, transport and communications capital, in the hands of the bourgeoisie, the landowners and all the imperialists associated with these Classes ”.

Consolidate the new socialist property on the means of production, reads the proletariat to continue the revolution under its class dictatorship, performing among others, specific tasks that materially eliminate the old andugue of the economic, political and marital enslavement of women, and thus, guarantee really his political equality in socialism. Necessary tasks for:

“Break all the bonds that prevent women from their full participation in society: 1 . I immediately prohibit all forms of discrimination against women: in suppartapation in the bodies of power, at work, in salaries and in the most areas of social life. 2. Socialize home tasks ... 3 . Promote the socialization of parenting ... 4 . Attend with special care matters such as pregnancy, which affect the working woman ... 5 . Socialist production relations will guarantee the material conditions for the reproduction and raising of children ... 6 . Promote

great ideological and political activity to educate men and women, removing their bourgeois point of view-expresses or undercover-, about the "right" of man to dominate women. Starting with eradicating all forming physical, verbal and psychological abuse of men about women. ”However, only the communist society will guarantee the total emancipation of women, because even with all the socialist revolutionary transformations to break the economic basis of oppression and inequality of women, and the great advance in the conquest of their real equality, - - Enespectial of its political equality - the gap is maintained during the socialism, as seen in the experience of Soviet power:

!For a true political equality for women2](https://www.revolucionobrera.com/wp-content/uploads/2023/02/Cifras.jpg)Today, when the power of the State is in the hands of the capitalist exploiters, the position of revolutionary women should not be in the institutions of the political power of the enemies of the people, but in the organizations that face that power: in mass organizations, union, peasants, student, popular, female ... and mainly the revolutionary political organizations that such as worker union(mlm)_, they fight for the construction of the revolutionary party of the proletarian and for the construction of a revolutionary female movement.

The scope and success of the socialist revolution is measured in the lamovilization and emancipation of women as part of the emancipation of the proletarian!

_ For the reason for the proximity of March 8, we reproduce an article published in the website of the Popular Movement of Brazil in November of the 2022 . The Spanish translation of the Portuguese is ours and unofficial, so that as well is completely ours._

The month of November marks the fight of the Black People, so the Popular Movement - MFP, comes to honor some black women that history in the struggle of the Brazilian people. Certainly there are a lot, they are anonymous heroes, progressive intellectuals and simple fighters by the people, and remains the task of the Brazilian revolutionaries disapprove and raise their standards.

Death to racism!

Long live the fight of the Black People!

Racism, the oppression experienced by more than half of the Debrasil population, has its roots in more than five centuries of oppression and exploitation that is based on the formation of our society, founded on colonialism, slavery and semi -feudalism. The permanence of this feudal remnant in the structure of society to this day is an ideological support for the exploitation of a large contingent of popular masses that are subject to the worst salaries, working conditions, housing and daily humiliations. It is therefore served to the domain of imperialism, the terradicas and the great bourgeoisie over the whole of the people and must serbarrid by the democratic revolution pending and late in our country.

It will not be through electoral promises, or cosmetic reforms to open up the capitalist system, such as the lure of representativeness or alleged individual empowerment that proclaims that the victory against the racism occurs with the enrichment of some people, fragmenting laclass and weakening the struggle of The oppressed. The anti -racist struggle can ytriunfar, deeply linked to the struggle of the working classes, in a new democracy revolution for the overthrow of the old order and for the construction of a new economy, a new policy and a newaculture.

Give Dos Palmares

Dandara is an expression of the black women who were enslaved, who were accepted to accept such a condition and dared to challenge and fight against the exploitation and oppression system in force at the time. Dandara, together with Azumbi, opposed establishing a peace agreement with the Pernambuco government, understanding that the conciliation between the Quilombolas and the colonial government would brought betray the struggle for freedom. When arrested, he preferred to go rather than return to his slave status.

Benguela Tereza

Born in 1700 and brought to Brazil as a slave, Benguela's Tereza was a significant unalíer of the biggest quilombo in what is now known as the Mato-Grosso statode, Quilombo do Piolho. Under her political and military leadership, thequombo, which included blacks and indigenous people released from the condition of Seclavos, resisted about two decades, until its destruction by the forces of Luís Pinto de Sousa Coutinho. Teresa resisted bravely and led Quilombola's larice until the end. As a way to humiliate it, they looked at their heads and exposed it to a post where everyone could see it. Teresa remains today an expression of the force of fighters.

MARIA FIRMINA DOS REIS

Born in Maranhão on March 11, 1822, Maria Firmina Dos Reis Hocnsidea The first black writer in Brazil and Latin America. To the Seraprobada in the Teacher Contest, she refused to climb on stage by the city of São Luís on slave loins. At that time, Firmina would have affirmed that "slaves were not animals to carry mounted people in them." In 1859, he published his novel entitled «Úrsula», under the pseudonym of «Uma Maranhense», considered the first abolitionist book of Brazil. Author said his texts without signing with his real name, but even so, he did not impose his ideas against slavery. MARÍA FIRMINA participated in the intellectual life of Maranhão, publishing books, articles in newspapers and magazines of a abolitionist nature, in addition to acting comfortable, Musician and creator of the first Mixed school in Brazil, even improving discontent in society.

Proletarians of all countries, unite!

Women, fight and defend us: against the wave of inflation and militarism!

On March 8 of this year, International Women's Day, the War of Russian imperialism against Ukraine has been just over a year. From which it began, the situation of the working class and the people in this and in all other countries of the world has deteriorated greatly. A wave of inflation is made that the cost of living is triggered in all areas, along with unatase of inflation that had not been seen in Germany since the second gueravingial, ending with our salaries before we can spend it. Noimportes what imperialists try, they cannot control the economic crisis that has been developing in recent years. Every time of the situation worsens and falls on our shoulders, the shoulders of the class and the people. The only thing they can do is demonstrate that their system, elimperialism, cannot sustain us and feed us and that it is a system. **Against imperialism and patriarchy!**

All this, the wave of inflation, the fall of real wages, the misguided of nurseries, hospitals and much more, affects the entire class class, but further affects working women, because somoso appropriate and exploited by imperialism and patriarchy. This is the situation in which popular women and working class live

around the world. Therefore, we have double reason to get up against this system and dislike our anger against it. The imperialists know it, so stressing to stop our struggle, making it a protest without teeth, channeling it by safe roads for the system, and are trying to devote us with their rotten and reactionary ideology. We must prevent us from joining our brothers and class sisters from all countries and unleashed our fight in a powerful storm against imperialism and the patriarchy. Instead, everyone should defend themselves or the interesting assumptions of their group. This is not the path of working class women, this is not our way!Patriarchy can only be applied if its economic base is destroyed: private property, today elimperialism. This requires a proletarian women's movement, led by the avant -garde of the working class, the Communist Party. And must be stakeholder with all the oppressed and exploited of the world. Because only under communism, private property no longer exists, only under the community the emancipation of women can come true. Therefore, this March 8 we fight side with the women of the working class and the people of all countries for a brilliant red future.

Towards the proletarian women's movement!

We have, like Slai Cobas and USB, launched from today a tour of neglhesile assemblies, to inform the workers of the dispute that we have opened concromune and company, on an increase in time, wages and defense of health, and which will see together with A table already summoned to the Prefecture, **Losciopero of the workers and workers who will take place on March 8.**

This morning this message sent to us by the Allactor Cisl of the kindergartens registered with them:

_ "Girls listened to I knew that the Cobas and USB enrolled will come to the stalk with you during working hours. It is forbidden to do work union. Vasto and Bruno Ciari. _ *ra will make trade union proselyism by filling you with chatter, to make them at their strike. Then on your time nn have allowed you to tell your structures and talk to all there may be letters contestation of non -authorization.* _ __se they asked for assembly ..... it is for their members. We do not have anything. of the contract with the Municipality I am nosta -attention. I think I have clarified.

What Alessio Carpignano della Cisl writes as well as totally false, is an evident anti -union action, which aims to prevent the free exercise of assemblies and strike and to discredit Slai Cobas and USB. therefore, beyond the union leinials that we are already taking, We will also report legallyquestasta O.S.

Assemblies can be done in the time and workplace(art. 20Dello Statute of workers); All workers and workers have the right to participate, *tutte* , whether they are enrolled in other unions or non -discounted to nothing; The assembly hour is regularly paid to all iPartiCipanti; No one will have a letter of dispute because both the assembly the strike are authorized This dirty and false maneuver only shows that CISL is afraid of the battle of the battle!It is therefore good, it means that we are affecting.

We all participate in the assemblies!We are carrying out our interests and needs, for too many years denied.

It is clear that in this perspective passosucessive is the world fire in the forms that the relationships of forcing will be and that certainly does not exclude the use of tactical nuclear or strategicoche nuclear is.

L'espansionismo imperialista italiano
L'attivismo del governo Meloni
in Algeria ed Egitto

"Il pacifismo non conquista, dipende dal fatto che si è pacifisti contemporanei, il contrario della conoscenza dell'imperialismo" Adorno nel discorso di accettazione del Premio Adorno

Nella linea con quella imperialista europea, in particolare quella di Draghi, è nuovo "attivismo" del governo Meloni della Italia, in particolare Italiano e Italiano per [illegible] all'imperialismo italiano in quell'area geopolitica che [illegible] [illegible] Libia, con [illegible] [illegible] [illegible]

The invasionerussian of Ukraine which reaches February 24 the first year is increasingly being achieved as an offensive step of Russian imperialism dictated by reasoning that, however, far from having restored the weight of Russia, he grabbed its downsizing process, has put On the carpet the realports of force currently existing in the field of imperialism.

The war launched in Ukraine was therefore a point of arrival of the imperialist inter -trading in the Europe/Russia scenario, but on the evidently of the US/China dispute of a world in economic crisis, a new division, in which every imperialism wants its partialism, makes the His part, contributes to that perfect storm that he can in the third world war. Ukraine found itself to be theterritory of the acuteization of this dispute, but within this equestrian territory disputes a decisive factor was the reactionary transformation of the ephaltian-nazi of the Ukrainian government which, going even further and forcing the capitalist bourgeoisy manodella, Ukrainian oligarchic , has become part of the pharmator triggering the acuteization of the world crisis and his transition to a mainly military phase.On a world scale it is right and necessary to loudly request that I stopped and the escalation of

This war, it is right to respond to the desire for peace that comes to the fire of the surrounding territories and other parts of the world, but Ilpunto is that these requests cannot be accepted by the powers that have triggered the current spiral and that indeed the They feed the alservice of the imperialist bourgeoisie and, in particular, of the parts of the Sielslegate to the war industry and which draw immense profits from it. Instead of overturning the imperialist governments engaged in the war, without stopping the reactionary imperialist governments that are sucked in valenti honors from the spiral Those, it is not possible to predict and determine the firm of the warfounder march.

Consequently, we must return to the strategic and analytical clarity of the world capitalist/imperialist world of the world who taught us and that Hannopraticated during the previous world wars the scientific masters of the working class, the world proletariat, of the oppressed peoples, Marx, Lenin, Mao. In particular, Lenin has traced the way and the strategy of opposing the imperialist war the revolution in imperialist countries as the heart of the motion of the peoples oppressed by the imperialism that existononel the current state of the world. Mao has clarified that either the proletarious movement with his struggle will stop the war or it will be necessary to oppose the revolution of proletarians and

peoples who, in the conditions of the war, was also with the use of nuclear weapons, increases and accelerates, and shows all the need of a fundamental fight to overthrow governments, states, the system that drags the proletarians and peoples in the world disaster.

In this theater the proletariat and popular masses exercise their opposition and liberation, according to simple indications to dilute in each country to overthrow their imperialism, the state and isuoi governments and to join the proletarians and peoples that lead the stessalotta in their territories on a world scale.The government and fascist nature of the government has constituted a load of 90ai pre -existing plans of imperialism, a zeal of servants, which is historically characteristic of the fascists, which makes the team of allotifadeli melons, servants and active supporters of the extension of the war conflict Edella progressive participation wherever there are interests and profits Italians to defend and expand. The Meloni government is the Government of the State and Private War Industry. Crosetto is a plausier procurer already in operation before he became minister. This government is Ilgoverno del Eni who dusts off Mattei's figure in the guise of interestsimperialists and spaces to be conquered in the strategic sector of energy. Ilgoverno Meloni is the government of new colonialism in North Africa, Tunisia, Libya. The Meloni government is the government of the European Zoppa duck that acts by the fifth column of US imperialism in the contradiction/Europe.

It is from this location that the coherent acts of this government come, by acting of the overwhelming majority in Parliament, transforms the parliament into an operational arm of the warfounding choices. Therefore, the increase in military expenditure is completely logical, the forcing state budget in this direction is completely logical, which means the cuts of the funds for health, school, work, social services. It is completely logical The energy crisis caused by the interimperialist dispute downloaded on the popular masses through the bills, the petrol increase that trigger and contribute to the overflowing increase in the cost of life. Inside this state of affairs, the return and accentuation of the state repression, the police state, securitarian laws, anti -medicine racist lapolitics, the relaunch of nuclear power, the search for a modern fascist, dictatorial institutional institution adequate to the phase of the acrisi, of the war Inter imperialist. The ideology of Fratelli d'Italia, DelSuo ally Salvini, the cult of nationalism seem to be the formidal and cultural form corresponding to the state of affairs.Construction, and here we return to the masters who have provided us

with the analysis and the way in the fight against the imperialist war and that they had the theoretical, political, programmatic heritage to build glists of this struggle: the Marxist-Leninist-Maoist Communist Party; The united class and anti -fascist and anti -imperialist mass, the new resistance force, to conduct the war on the war, and now open the way to a change of strength relationships that puts in gradually and masses to oppose, oppose and finally obtain it is On the path of the socialist revolution, in unity and in close bond -interactionist with the proletarians and peoples who travel this samestrada.

The Metroviaries of Belo Horizonte(MG)In the week of the 27th Defevereiro, their third week on strike indefinite and with paralysis of services were completed. The workers require the reversal of the privatization of the city's subway to the city, held last December, and reject the resignation of 1,600 workers after the start of operations to the private company.

In addition to the written commitment requirement that the 1.6 milksproof dismissals will not occur, strike workers also report more a Lula/Alckimin government commitment(federal)and Romeu Zema(state)Dalling the sector's private monopolies with public money, as well as the road transport companies. In exchange for these agreements, apopulation suffers from bad services and workers with the exploitation of aximal.

The struggle subways also report the sale at the “banana price” of 35 compositions, 19 stations, four power substations, 29 kilometers rail and buildings along the stretch. They point out that attendance after privatization is that the services are even more scrapped and the value of tickets increase.

This is the fourth strike held in 12 months by workers, after adequate intention to privatize services. The first strike took place last March, and lasted 42 days.

The workers have been on strike since 14/02 despite diverseness of the reactionary judiciary and sabotage of mobilization by the Urban Trains of Minas

Gerais(CBTU-MG). A “Justiça” do trabalho acatou aum pedido da CBTU-MG de bloqueio judicial imediato no valor de R$ 250 mil dascontas bancárias do Sindicato dos Metroviários de Minas Gerais (I don't upro), as he applied a millionaire fine that grows every day.

Massive occupations of poor peasants estate in Bahia continues. In the early hours of February 27, about 1,700 peasant families has in place four estates in the southern end of the state. According to communities released by the Landless Rural Workers Movement(MST), the targets of the peasants were three eucalyptus estates of the companylathifundia Suzano Paper and Cellulose S/A, located in the municipalities Detertixeira de Freitas, Mucuri and Caravelas, and an abandoned landlord for over15 years, named Fazenda Limoeiro, located in the municipality of Jacobina. Family requires immediate expropriation of the estates so that they can viver and produce with dignity.

Since the beginning of 2023, in the state of Bahia alone, more than 9.4 thousand peasants have mobilized in defense of their lands against the landlord.

The MST states that occupations were a response to the expansion of eucalyptus in the Bahia and that peasant families require the immediate expropriation of the lands to be delivered to families.

Peasant families repudiate problems related to the water crisis in the muds neighboring the estates of Suzano Papel e Celulose Ltda, caused by large scale production of eucalyptus and the aerial spraying performed by monoculture

areas. In addition, the peasants denounce other irreversible environmental impacts caused by eucalyptus, such as siltation, floods, landslides, prolonged droughts and fires.

In the third quarter of 2022 alone, the large company had R $ 5.44bits of profits, and the sale of cellulose and paper exceeded 2.8e 311 million tons, respectively.

Currently, Brazil has the largest eucalyptus forest in the world, an area that surpasses the planted by rice, beans and coffee. While eucalyptus profit enriches the latifundium, rice, beans and coffee is, sin, part, planted by peasants in the worst land, with the worst credit and constantly attacked by landowners.##### **Peasant Fight Add 9.4 thousand peasants mobilized in January Eparis in Bahia**

The and reported that late January and early February was marked by peasant mobilizations in the state Dabahia. From January 30 to the 13th Defevereiro, about 2,600 peasants participated in the Tomandoterras mobilizations, closing highways or occupying buildings of the old state. In the Dojequiriçá Valley, 250 families occupied two farms. The City Hall of Santa Cruz decabralia was occupied by 200 peasants(representing another 400)Pomelhores on highways and public services and the construction of a bridge. In Sento Sé, 300 peasants protested against Australian mining company-Iron_ Tombador and demanded immediate asphalting DABA-210. In Correntina, in the Bahian Cerrado, there was a large protest against Agile and the gun. In Itabela 178 families were dumped from theirterras. **Added to the new wave of occupations on 27/02, the FEATURE mobilizations in Bahia in January and February total 9.4 thousand peasants.**

This situation, in which only in the state of Bahia almost 10,000 peasants actively actively in defense of their lands, is another symptom of the intensity conditions of life of the Brazilian peasant mass. Exploited by the pliers, peasant families with little land or landless are not agable of being able to have the right to live and work on their lands. This new end of the peasant mass struggle against landlords is only the beginning of an incomitable wave of dirt outlets across the country.

Colombia. Last Thursday, February 23, young students annoying the expiration of student insurance and the lack of maintenance in the schools demonstrated at two different points in the capital, national university and the main school of Cundinamarca. As it was to be expected, the riot police arrived at the scene generating clashes with students who responded with Molotov stones and cocktails.

Brazil. Against the crisis that plagues the Brazilian people, at least 1.400 peasantfamilias took land possessions during the "red carnival", in the states of Aagoas, São Paulo(In the Pontal do Paranapanema region), Mato Grosso do Sul and Paraná. In the following of the month, it is expected that it will continue to adapt to land since they officially belong to the Union and should be resolved to the "Agrarian Reform", however, they are in the hands of the relatifundistas and in many cases without documentation. The luminous walk the Agrarian Revolution stands out in Brazil to the shout of New Democracy.

Márcia Jacintho, a mother victim of violence from the old state, will hold a chat at the book's launch about her struggle for police engaged in the murder of her son Hanry. The chat will take place in 1st Mark, at Travessa Bookstore, R. Volunteers of the Fatherland, 97, Botafogo neighborhood, at 18:30.

His son, Hanry Silva Gomes da Siqueira, 16, was executed by Porpolyis at the Lins Complex in Rio de Janeiro in 2002. Since then, there has been a remaining struggle, portrayed in the book Marcha do Silence, by authored journalist Itamar Cardin.

See here the *release* of the book:

Hanry did not return home on November 21, 2002. The next day, after projecting him throughout the community where they lived, Marcia, her mother, found that the 16-year-old had been killed in a shot with police. It was a self -resistance auto in the Brazilian peripheries. It was?

Alerted by the residents themselves that Hanry had been unjustly dead, Marciainized an unlikely search: to investigate how his son himself died. Fora. Until finally the truth(or part of it)it came to stop and open the marks of police violence against the Brazilian black.

Starting from this story that occurred at Morro do Gambá, a community belonging to the Lins Complex in Rio de Janeiro, journalist Itamar Cardin refered to the almost ten years the footsteps of Marcia's investigation. The research is now on its first book, March of Silence, a novel novel that is being released for the season, a seal of the literacy publisher.

Black genocideABOUT THE AUTHOR

Itamar Cardin is a journalist graduated from Cásper Líbero. He worked in great ves of the Brazilian press, such as State and April Group, and spent a lot of last years dedicated to the project that resulted in the creation of his early book. During this period, it was selected for a National Library/Funarte Creation Scholarship.

Marketers from the city of Jaboatão dos Guararapes, in Greater Recife, blocked with tires in flames both ways of Avenida Agamenon Magalhães, one of the prince of the commercial area of Knight. The protest occurred after Mano Medeiros'(PL)Having triggered the police to remove the Workplace Ostas. The demonstration took place on the morning of February 26.

The workers carried written posters: “Mano Medeiros, the people are narua and it's their fault. Don't take our bread!” And "Mano Medeiros, let's not stop fighting for our workplace." They also chanted the watchword **the united people will never be overcome!** .

To Jornal do Comércio, from the UOL monopoly, the marketer Ivanise Maria said it is being harmed by the Municipal Government: "We were taken and placed local that could not work. In the last rain it gave, the lamp work flooded. I sold it outside one day, I spend three days inside to work on the goods. We returned from the pandemic and take away, without negotiation, because we had no opportunity to sit with the mayor in no time. "

The marketers work with the sale of fruits and vegetables, perishable foods and since there is no movement where they were relocated, their markets are going out.

In 2017, about 100 marketers from the same place, from the Knight Market, blocked Barreto de Menezes Avenue after being moved by the prefecture. In 2019 and 2021, other street vendors and marketers reported similar protests for the same reasons of expulsion by the police of their workplaces.

PC February 28: capitalists and war/workers and war. From the intervention of the worker of the Tenaris Dalmine of the Slai Cobas SC to the anti -capitalist proletarian assembly of 18 February

Images: []

Tenaris Dalmine is a large multinational, linked to Eni, which wants to move in the wake of imperialist politics, of its movement and war. As the master Rocca says, the Tenaris is able to "redefine the chain of global value", and days ago, speaking directly, the big non -workers, as the first point he spoke of the Ukrainian war: _ "the competition is growing between the Western democracies. This change is causing a repositioning of all the divalor chains which is in turn relaunching significant investments in the aerial sector in which Tenaris has an important presence, such as Stateuniti, South America, Mediterranean and Middle East. "_

How can this translate into the factory? There is an increase in exploitation Chenon has still led to a necessary struggle, but to a co -philitism.

Tenaris has doubled the profits by throwing out so much workforce. And he has it thanks to the confederal union agreements on renovations.

Tenaris Dalmine is a company that directly deals with the Alternanzascuola Work, in Italy it is connected to the technical institutes; One of the freezes, Gianfelice Rocca, is in open harmony with the new Minister Valditara Suquesta question, on a school that must develop the skills for work.

But this situation also shows that the factory is one of the main centers of which you have to do it

clash. This week with the motion against the war in Ukraine, we are going to cover the whole factory.

We are 100 days of the Meloni government; And on this government it is good to be. It is true that it is always a government of the masters but has didiscontinuity characters, because on all the issues even the economic ones puts it ideological and political load. A war propaganda and thispropaganda strikes in the sign, taking into account that in the factories, and innarticular in the great factories, the union that should be at least for peace against the war, is not disturbing the operator. And Allatenaris are going all the plants at full speed since, for the injury of the war, the pipes for oil is selling much more.The motion against the war has allowed us to deal with the workers, who are above all young, who are found for the first time in the factory. One of them said: "I am entering the ward I am going to war", this saying that all EXTERNAL TENARIS has a whole system that seems that it is well, but the increase in exploitation also creates the situations

of the workers who understand that this is not their war, which I do not have to support this war.

This allows us to say that this is an unjust war, that the classy class is needed to make a right war that for rights, the chenenus salary is doing.

We must return to do this work among the workers on the war because there is an open unterreno, but it is necessary to build a committee with the workers who begin amuveri, because not all the workers are lined up on the other side, but Senon we do this work the workers yes they take the wrong side.

There is an open battle and we went to say that not only we have to be able to have more wages more, we must put strike against the war, because this is a war of the masters, an imperialist war. And the Nostronemic is in our house and at the moment it is the Meloni government.

Then there are all the various opportunists, the political forces that are not to achieve this aspect of war as the center of reactionarization which come forward in each country, because they need to unrequise(This is the logic of the anti -rage decree, etc.), to attack the Checomincian workers to mobilize but also the workers who begin to think.

Because if a committee of workers against the war against the war is born to the Dalmine is something that will also make the Padron Rocca worry, much more diaults of union battles that we still carry on. And lechers who are coming forward create a favorable ground on this abotaglia.

Schwenningen | 28.02.2023 | Villingen - Schwenningen Turkish progressive - revolutionary immigrant institutions and German institutions have been organizing a joint breakfast in Linkes Zentum Schwenningen every month since November. While a target of Bukahvaltınları is to strengthen the partnership of the field as domestic and immigrant institutions, the second goal is to bring the mass together and to evaluate the current developments in Europe and to act jointly in the direction of what can be done.

It was decided to turn the breakfast to be held on Sunday, 26.02.2023 into solidarity breakfast with the earthquakes in Turkey. The event started with a brief opening speech by a friend from Atif. After breakfast, the program was started. A doctor friend who came to the earthquake zone and carried out TTB ilçalısız and told the people who experienced in the area, the intensity and the dangers that were observed in the long run and the people in the earthquake zone. Neffable intervention and state policies were discussed.

Finally, doctor friend; “The situation of the people in the region cannot be solved in the short term. Toilet, shower, shelter, heating and access to the right to health for today's needs. However, since the states due to the fact that the state did not make the necessary intervention cannot be solved in a short time, scabies in the coming period(The last day I worked there, scabies started)Various epidemics will start. In addition, the people are still not shocked by their experiences.

Traumatic problems will begin in the process. The essence of the region needs very serious solidarity. But this solidarity is in long -term. Maybe a year, perhaps for a longer period of solidarity. This will give the people solidarity. " said.

1,000,00 € donations were collected for earthquake victims at solidarity breakfast

Women's groups are preparing to conduct series and protests, under Gabriela's leadership, at the opening of March's Month Month. It began on February 17 in front of SM North in Quezoncity and in front of the Iloilo Provincial Capitol.

“The National Women's Month will open this week and the Marcos-Duterte admin will surely have many decorative offerings to Filipino women. In fact, it does not solve the main source of enjoyment of the women's true freedom - poverty, lack of opportunity, violence and exploitation inside and outside the home. Instead, the government is at the forefront of neglecting and torturing us, especially in the sweat of sweat, ”said Gabriela Secretary General Clarice Palce.

Ferdinand Marcos Jr.'s destruction of the grievances of the wages and other economic problems are further exacerbated by his "anxious lifestyle" and his family, according to the group.

"According to the government's conservative forecasts, 33 million Filipinos live in constant poverty, and they are estimated to increase this year. But the leading leaders are not consulting as they travel abroad, watching consumer, dating, delivering helicopters, while Ordinary Filipinos pay them by adding taxes, extra-fares, rising prices of goods and services "according to Palce.

Women remember to commemorate the international day of the country's lady's lady on March 8, 1971 against the former president Ferdinand Marcos Sr.

To the fields to defend nature!

Capitalism is called all kinds of methods to slaughter our nature. Particularly in the last place, military budgets are increased and arms production has been accelerated. Nuclear bomb threats continue to be told by the imperialistvlets. Imperialist states are called everything to destroy all living things and nature. Ecological crisis. To stand against these policies, the responsibility of all youth stands in front of us. It is time to go to the streets to protect our nature and to encourage those who create an ecological crisis. In this sense, as YDG, we do not participate in the FFF actions that will take place in 3mart 2023 in Germany.

Change the system, not nature!

Members of the Batangas Labor Union AtCentral Azucarera Don Pedro Professional Technical Monthly Paid Workers UnioninC launched a picket. in front of the Central Azucarera Don Pedro in Nasugbu, Batangashapon. They have revealed issues of interference in the union, intimidation and harassment against the union and its members and the extensive lack of livelihood due to the closure of the Ilohan.

The Cadpi closed its three major departments in Nasugbu on December 15, 2022. According to Christian Bearo, Sugarfolksunity for Genuine Agricultural

Reform spokesman for Genuine Agricultural Reform(SUGAR)-Batangas, approximately 12,000 farm -made farms and more than 7,000 small plantators have lost its livelihood due to unjust closing of the Suffer. "It destroys the local sugar industry not only in the province, but in the country," the group said.

In the pickets, workers insist on reopening the Ilohan when it comes to work, adequate configuration with sugar plantators and respect for those agreed at the Collective Bargaining Agreement of ManEyeydsment and Union.

Two unions filed a motion to strike on February 8 at the NationalCiliation and Mediation Board(NCMB)Against the Cadpi in connection with its failure to respond to workers' demands.

Together with the Makabayan, the CADPI workers and farm workers filed a resolution to the House of Representatives on February 15. They also interviewed other representatives in Congress to gain support for their calling.

Prior to that, the government's sugar-bangas insisted on buying and overseeing the CADPI operations to save it to strengthen the local sugar industry in the province.

According to sugar, the closure in Batangas in Batangas greatly affected the closure. This is because only 4,500 metric tonnes of sugar can be grown to the remaining sugar mills in the province compared to the capacity of 12,000 metric tonnes per day. At the forefront of 2020, the CCADPI covers 10,980 hectares of the province.

Residents of Maysapang, Barangay Ususan, Taguigcity launched a protest on February 22 to oppose the community demolition. The last day was also the last day of the R-II Builder and Mgsconsortium imposed to "demolish" residents or destroy the homes.

The protest was attended by members of the united resident MaysapanHome Owners Association Inc and Anakbayan Taguig. The program marched around the community and the program ended along Levi Mariano Avenue. In the

middle of the program, Jericko Security Agency repeatedly harassed and scared the residents.

They insisted on the local government of Taguig City and mayor Mayor Lanicayetano not to sign the Certificate of Compliance which would give full permission to the R-II Builders and MGs consortium to destroy the houses in Maysapan.

On February 26, residents re -enacted a mass meeting with their campaign against demolition. A few weeks later, the residents of Maysapan residents were protesting on a protest on February 3 to register their united stance.

On February 2, the combined forces of the BCDA, R-II Builders/Mgs Consortium, the local city, SWAT, and ruling of residents, conducted a "consultation". At the conference, citizens insisted on their opposition to the land that their homes were resigned, and continued to call for the right to residence.

1. The Ukrainian people resists heroically

On February 24, a year of the Russian imperialist invasion of Ukraine was completed. Putin's plan consisted of a rapid occupation of kyiv, demolish capital, and extend to the whole country. The plan failed. The invading troops were consistently with a very hard resistance from the military forces and the people's people, who forced the recoil of the Russian troops.

The war concentrated on the rich region of Donbás, where prorruse fascist groups operate, and the strategic region of the southeast, where Russia occupied in 2014. That added the destruction with missiles and drones of the energy of energy, transport, sanitary, water, water, water, water, water , etc.

The division of the Russian forces, the advance of the hard winter and the Patriotismucraniano created the conditions for a counterattack, which forced the backward in the two fronts in struggle. The fighting was copying the detrincheras tactics of World War I, with soldiers on either side in Elduro Winter.

The United States and NATO, who had been advancing in the east European, contribute and training, and the Ukrainians put their chest.

Ukraine today has 500 thousand combat men. Putin does not have the million and medium to comply with the military rule that the attack force must serve the defense.

Argentina promoted and voted a resolution in the United Nations and issued a unchanged: “Argentina reaffirms its commitment to the principles disobeying and territorial integrity of states and human rights, axespermanent axes of our country's foreign policy. It rejects the use of the force as a mechanism to resolve conflicts and, in this sense, its suite reiterates to the invasion of the Ukrainian territory by Russia. ”

The invasion of Ukraine aggravated the dispute between the imperialist powers, and puts the world on the edge of a new World War. On February 21, it putin ancient that "suspend" its participation in the New Start treaty with aunids, which limits the strategic nuclear arsenals of both nations.

As we have raised from day one, we reaffirm: Out of Russia Deucrania! Outside the United States and NATO!Solidarity with the patriotic struggle of the Ukrainian people!

2. The dispute above and the fight below The United States announced on Friday 24 a new series of sanctions to companies, banks, manufactured products and people, including entities that help Russia evade previous penalties. The president, Biden, explained that he made clear what would be the consequences of China to provide Moscow. "I said:" If you are involved in the same type of brutality, if you support the brutality that is happening, you can face the same consequences, "he added.

The White House announced the same 24 that the Pentagon will contribute 2 billion deide in ammunition and a variety of small drones with cool technology to the fight against Russia.

Russia began joint naval exercises with China and South Africa, in the Indian ocean, in an area between the South African ports of Durban and Richards Bay. For the side of the Yankees, they advance in the Indo-Pacific area, quadruplying the US troops parked in Taiwan .

The workers and peoples of the world fight growingly so as not to continue to apply the consequences of this situation. Thus in Europe there are stoppages and massive people in many countries, and the fight extends to all the continents.

In Latin America, the Peruvian people continue their fight against the Didin Boluarte dictators from January.

In Ecuador President Lasso was defeated in recent women's elections and in a referendum. Conaie(Confederation of indigenous nationalities of Ecuador)He demanded the resignation and responsible for the murder of Eduardo Mendúa, one of his main leaders. President Lasso with Albanian drug traffickers also investigate.

3. Emergency struggles and sovereignty

Food inflation in February climbed 7%. But Auh beneficiaries(Son assignment)and the aue(Pregnancy assignment), they will be crowded $ 12,500 if they have a single child and $ 25,000 if the children are 3 or more.

The CABA food and services basket, for the first month of the year, was $ 334,322. Those who cannot pay the rent and the services are growing every day and live in the street. But the city government privileges its real estate agents.Teacher guilds fight for their salaries in their peers, so in sevenprovincias the classes will not begin. Banking unemployed in the CABA, denouncing that banks earn fortunes and do not open their hands.

On March 10, 11 and 12, organizations of family, peasant and original agriculture, and artisanal fishing, producers and producers, carry out their congress for the land and debts. They defend the food, the land and national sovereignty. They face the determining power, pulses and exporters of grains that have been raising in Papala.

The preparations for the women's movement continue throughout the country for a day of struggle on March 8, International Women's Day, with the slogan "Debt and lack of justice remains connoted." They also denounce the multiplication of femicides and violenciacontra women.

On March 3 and 4 there will be a flag on the Rosario-Victoria Bridge for the Obereeía: Close the passage of the exporters and trade stock direction of the navigable roads. And enough ofecocide in the wetlands.

An example was given by the president of Mexico, López Obrador. He signed the decree to nationalize the lithium and said: "So that foreigners, China or the United States do not exploit."

4. They want to get the town out of the streets. They will not get it

On the night of 24 and 25 they violated, robbed and destroyed in the house deatiation and community accompaniment(CAAC)From Melchor Romero, La Plata. The Jaches of the CAAC demand that the National, Provincial and Municipal Government see the safety of the facilities and referents of the CAAC YPIDEN SOLIDARITY AND DISSEMINATION, so that the whole society finds out that there is a one that organizes and faces the punishment of drugs in La Plata ".

We fight for the rapid investigation and punishment for the aggressor in the attempt of Lautaro de Lautaro Nahuel Ardura, delegate of ATE de la Pampa. Also to investigate the threat of death to Sebastián Saldaña, leader of Lacc de Santa Fe, and for the progress of the cause for the attempted Ajulia Rosales murder.

Follow the fight against judicial persecution to the companion Myrian Carballo, leader of the CCC of Chivilcoy, and Marcelo Barab, leader of the PCR DECHUBUT and other social fighters.These and other events show an escalation of violence, judicialization and demonization of popular struggles. What is the difference between a Nazi and Pichetto when he says: "The Mapuche was an invading people who stole cattle and women, and disputed the Patagonian territory in favor of Chile"? Patriciabullrich is not far behind when he campaigns in favor of the guns to suppress the struggles.

** They want to get the people out of the streets. Govern and deepen the one, delivery and repression.

5. of candidates and guns taser

Macri has more than 100 causes in justice, but they are drawn. Keep the silence about whether it will be a candidate for president or not. In the PRO and LAUC they dispute half a dozen candidates. Until now, officially, Rodríguez Larreta was present. Quickly Patricia Bullrich described him as "warm" and stopped asking permission to buy "taser guns."

The taser are electrocho weapons that, having contact with the person, temporarily. It has been proven that severe and/or death can cause.

On 28/2 there will be a new march of the Agricultural Entities Link Table against the Government. They press claiming the decline in retentions and a "soy dollar"

dollar, which does not reach the farmers but to the bolts of landowners, pulses and export monopolies.

A group of senators broke with everyone's front and formed their own block. With what the FDT stopped having its own majority in the Senate. The incorporation of that group of Alejandra Vigo, Cordoba, showed the hand of the governorschiaretti and other governors.

Fifteen provinces advance their elections and take distance from the national elections.

The "table" of the front of all, until now, was reduced to the struggle deposible candidates for president. And he left in the air again. From the FDT, the only ones who announced their candidacy are Daniel Scioli, Juangabois and Claudio Lozano.

The complaint of mothers and grandmothers of Plaza de Mayo demanded and got the 24th demarcation to mix the historical repudiation of the dictatorship and repression of popular lumps, with an electoral act.

6. Enough to pay the usurers! The IMF imposes us and the government accepts. But there is no way to meet the metasimposed by the IMF. The Central Bank is 4,000 million dollars due to the agreed. In January, the government paid interest for 1,463 million dollars.

Massa met with the IMF head. Try to approve the numbers to stop a disbursement for 5.4 billion dollars to pay another quota of the fraudulent debt left by Macri. They give us the dollars for a window and we deliver them in another.

The Argentine government argues that the war in Ukraine, from Russianinvasion, caused Argentina to an economic damage close to the 5,000 million in its commercial balance and a fiscal cost of $ 588,000 minions.

The reality is that to that damn agreement with the IMF they are paying it, with the inflation among other things, the employed workers, retired and disappeared with the adjustment in their income. **The debt is with the people. Not with the usurers of outside and inside.**

7. The political debate grows in the masses

The beginning of classes is a drama for millions, which cannot buy users, overalls and sneakers for their children. That is why among popular

emergencies we fight so that from the National Government, provinces and municipalities deliver school kits so that all and all boys are accessed to classrooms.

In the midst of these struggles for popular emergencies and claims for national objectives, the political debate grows in broad masses How is the situation in favor of the people?

From the PTP-PCR we put the center in leading popular struggles and in lapelea so that they converge. From there we fight in the provinces and municipalities that have unfolded the elections, for the formation of electoral fronts that contemplate these claims.

We are going to this political debate with our proposals expressed in the **tenmed** , with the **resolutions** of our recent 13th PCR Congress, and offering a struggle in the PCR and the JCR, to advance in the I walk the national and social liberation of our homeland.

With these instruments we address electoral situations in the provinces and nationwide. But we know that they are not exhausted in this, because what is playing is to advance in the unity for the struggle of the popular sectors, in the path of a revolution that frees us from the estate and the dependence, and permeated the construction of a new state, in hands of the working class and elpueblo.##

Photo: For March 8, from the PCR and its JCR we promote a day with strikes in workplaces, and marches and acts throughout the country.
